

Construction Industry Guide to Site Safety 2008

Released in March, the **Construction Industry Guide to Site Safety 2008** includes the latest, up-to-date safety information on:

- working at heights
- electrical safety
- noise hazards
- hoist safety
- UV radiation hazards
- emergency preparedness.

The *Occupational Health and Safety (Commonwealth Employment) Act 1991* states that employers have a duty to employees to provide information, instruction, training and supervision to enable workers to do their job safely without risk to their health.

Displaying the **Construction Industry Guide to Site Safety 2008** chart is an easy way to keep on the right side of OHS law. Hung where staff can access the useful information and tips daily will remind employees about correct practices and procedures, while at the same time helping to protect your businesses from costly injuries and illnesses. It is a valuable resource for induction training, safety meetings and toolbox talks.

Pro-Visual Publishing and the Master Builders Association of Victoria have worked closely to produce the chart with more than 4,200 copies sent out free of charge.

Similar charts are also available for the New South Wales, Queensland and WA construction industries, the electrical industry, plumbing industry, mining industry, HVAC&R industry, and for public works & services sector. All charts are produced and distributed without cost thanks to sponsorship from responsible supply-chain businesses committed to raising health and safety awareness.
